received a 5-Flask rating from Ida on 11/09/2018: this pharmacy is horrible on customer service!! they wont pick up the phone to refill meds for patients and when I called the supervisor of the store,Walter, he was enabling them telling me they were. Read more >>. A pharmacy is a facility whose primary function is to store, prepare and legally dispense prescription drugs under the professional supervision of a licensed pharmacist. Definition: A pharmacy in a clinic, emergency room or hospital (outpatient) that dispenses medications to patients for self-administration under the supervision of a pharmacist. Who must obtain NPI?: All health care providers who are HIPAA-covered entities, whether they are individuals (e.g., physicians, nurses, dentists, chiropractors, physical therapists, or pharmacists) or organizations (e.g., hospitals, home health agencies, clinics, nursing homes, residential treatment centers, laboratories, ambulance companies, group practices, Health Maintenance Organizations [HMOs], suppliers of durable medical equipment, pharmacies) must obtain an NPI. The NPI will be used by HIPAA-covered entities (e.g., health plans, health care clearinghouses, and certain health care providers) to identify health care providers in HIPAA standard transactions. A covered health care provider, under HIPAA, is any health care provider who transmits health information in electronic form in connection with a transaction for which the Secretary of Health and Human Services has adopted a standard, even if the health care provider uses a business associate to do so. Some organization health care providers are made up of components that furnish different types of health care or have separate physical locations where health care is furnished. These components and physical locations are not themselves legal entities, but are part of the organization health care provider (which is a legal entity). A pharmacy is a facility whose primary function is to store, prepare and legally dispense prescription drugs under the professional supervision of a licensed pharmacist. Where NPI should be used?: The NPI must be used in place of legacy provider identifiers, such as a Unique Provider Identification Number (UPIN), Online Survey Certification & Reporting (OSCAR) and National Supplier Clearinghouse (NSC) in HIPAA standard transactions. There are two categories of health care providers for NPI enumeration purposes. Entity Type 1 providers are individual providers who render health care (e.g., physicians, dentists, nurses). Sole proprietors and sole proprietorships are Entity Type 1 (Individual) providers. Organization health care providers (e.g., hospitals, home health agencies, ambulance companies) are considered Entity Type 2 (Organization) providers. A facility used by pharmacists for the compounding and dispensing of medicinal preparations and other associated professional and administrative services. received a 5-Flask rating from Ticha on 12/17/2018: This man is a life saver, my girls see him and I thought he would be the basic Psychiatrist in the Largo area, but I was sadly mistaken. He is nothing like the rest, he is the best. He knows what he i. Read more >>. A pharmacy that dispenses generally low volume and high cost medicinal preparations to patients who are undergoing intensive therapies for illnesses that are generally chronic, complex and potentially life threatening. Often these therapies require specialized delivery and administration. Address: 2101 S Voss Rd Ste 1500,, Houston, TX, 77057 Phone: 832-491-8088.
