- The NuWave Oven Pro Plus's maximum cooking temperature is 350F. Conduction is the heat that is applied directly to the food. \*All assertions have been independently tested and verified. For steaming, loosely wrap the vegetables, adding a sprinkle of water to circulate steam. The serial number will start with a letter followed by a series of numbers. - The NuWave Oven Pro's maximum cooking level is Power Level HI, which cooks at 350F. You can do all the above and much more. It all depends on how you prep the food. 4. I have a NuWave Oven Pro, how do I change the Power Level? NuWave Oven uses a long lasting 1500-watt SHEATH HEATER which can last up to 30 years and is similar in durability to most conventional ovens. The NuWave Oven does not use halogen bulbs as a heat source because the halogen uses only 1200 watts and is proven to generate smoke when grease splatters during the cooking process. A halogen bulb also requires regular replacement, which drives extra maintenance costs. - Press the Power Level button and select number 0 to return to Power Level HI. The model number and serial number are located on the back of the power head. If you are placing stuffing inside the turkey, either add it during the last 45 minutes of the cooking process, or if you place it in from the beginning, increase the cook time 3 additional minutes a pound. Only the NuWave Oven features the patented locking mechanism, which securely holds the dome and the power head in place when the oven gets hot, preventing them from separating and releasing
